

MAGNUM[®]

2023 EU COLLECTION

5 STAR END USER REVIEWS

ABSOLUTELY MINT - Alex

"This is my second pair of these. The 1st pair were spot on. Lasted ages. I'm a porter at the hospital and walk around in these boots all day. They're not only comfortable they're very light. The soft sole makes for a good boot. My feet after a hard days graft are as good as they were in the morning. Mint."

HANDLE ANYTHING FOOTWEAR - Tracy Carter

"After a serious knee break and a long painful rehab feeling surefooted became everything I had been managing with second best until I tried Magnums. I actually feel like I can handle anything again - genuinely seem to walk a little taller and with more confidence all from decent solid (but crazy comfortable) footwear - who knew!"

PREMIUM QUALITY - Chester Clarke

"It's easy to put on plus it feels like trainers when walking wouldn't know the difference. The rubber is premium quality. Thank you"

ALWAYS EXCELLENT TOP SHELF GEAR - Gregory Fletcher

"This product is unbeatable although it carries a larger price but in combat boots there is no limit as your life depends on your wits and knowledge in combat situations it's as clear and sure as going on a gut feeling choice I believe."

BRILLIANT BOOT - Lisa Bennett

"I need a good pair of sturdy boots for my Immigration job so I went to the local army stores and bought these. Once I'd broken them in they were so comfortable to wear I wore them all the time. They've lasted me a good 4 years, but need replacing now sadly. A fantastic boot though and I'd highly recommend them."

LONG LASTING - William

"This particular boot was issued as footwear while I was in the UK ambulance service in the front line. When I retired I took my pair with me, they had been in use a year. Since then I have spent the past 9 years travelling in Nepal, Thailand, Philippines, and my boots are still good. Best pair of boots I have ever worn for comfort, and value for money."

I HATE NEW BOOTS - Harold Floyd

"I hate buying new boots because they take ages to wear in. I got a pair of these boots and put them on in the house and thought I would start the wearing in process around the house. After wearing them in the house for only 2-hours I thought why not wear them on my daily 6 mile walk. I walk on tarmac, canal path and through fields. At the end of the walk the boots felt even more comfortable, not one sign of a hotspot or blister. Oh and it was raining. One of the standout features for me was that these boots are so light that you can't feel the toe protection. Some boots after you've been walking for a while you can feel or sense that there is toe protection there. I actually had to check to see that these did have toe protection at the end of the walk. I served in the military for 26 years, so I know I know a thing or two about boots. I currently work as a health and safety advisor working in all different types of industries, ranging from bin men all the way through to construction and railway. I will certainly be advising anyone who works outside to be looking and seriously thinking about purchasing these boots for their staff. If you're thinking about it, don't think, just buy them. I guarantee you won't regret it.

If you look after your feet your feet will look after you."

GREAT BOOT WITH AWESOME PROTECTION - David Wakley

"It's like wearing a trainer but in the knowledge that it has the best in protection, Love my Magnum's!"

MAGNUM BOOTS: FROM 0 TO 100 IN 40 YEARS

Magnum Boots evolved out of Hi-Tec Sports, the footwear company founded in 1974 by Frank van Wezel. It was Frank's love for sport that led him to build an innovative, lightweight, and instantly comfortable sports shoe.

The first Magnum boot was born in 1982 through a request from the FBI training centre for a strong and lightweight, athletically built, black tactical boot. Once the FBI spread the word, the demand came to supply this product nationwide, as more and more law enforcement and security personnel wanted the comfort and superlight performance our product provided.

With a solid reputation built across the USA, demand from around the world increased. As a result, the Magnum product range expanded to meet the wide range of high-performance needs of professionals working in high pressure environments globally.

Today, the Magnum brand is sold in almost 100 countries around the world. It is the first choice for law enforcement, fire, security, ambulance, hospitality-service, health-service, construction, and industrial professionals.

OUR AIM

Magnum is proud that our consumers are some of the bravest men and women on the planet, protecting us on a daily basis. They rely on our products to perform to the same exacting standards as they do.

Our aim is to continue to protect and serve these heroes by making the highest performing footwear, which always exceeds their demanding expectations, in all of the challenging environments they face.

Through our constant innovation, and belief that good enough is never enough, Magnum footwear will continue to push the boundaries of performance, to exceed the needs of today and of tomorrow.

OUR VALUES

PIONEERING

We must continue to innovate, just as we did with our very first product.

RESPONSIBLE

We keep the very highest standards, because lives depend on it.

UNCOMPROMISING

We never do things by halves. Using proven technologies, we bring globally certified performance products to market.

TRUSTWORTHY

We can always be relied on to exceed the strength, comfort, and protection of our customers.

High compression set and rebound for all day comfort

Environmentally friendly durable lining

All day fresh odour control

MAG-DRY WATERPROOF

MAG-DRY WATERPROOF MEMBRANE

Our **MAG-DRY** membrane lets moisture out without letting water in, keeping feet dry and comfortable all day.

Waterproof bootie construction to keep your feet dry
High level of breathability keeping feet comfortable

Windproof for better protection against the elements

Abrasion resistance lining for durability regardless the activity

MAG-DRY PRO waterproof & breathable bootie membrane exceeding SATRA's Dynamic Footwear Water Penetration Test requirements, with protection from blood borne pathogens.

VIBRAM ALL TERRAIN OUTSOLE

Vibram® is the world leader in high performance rubber soles, combining quality, innovation and the best components for their specific use. Their outsoles are produced with three objectives; to guarantee the best performance, the maximum level of comfort and long lasting quality.

TECHNOLOGIES

M-P.A.C.T.

M-P.A.C.T. COMFORT MIDSOLE

RECOIL MIDSOLE

69%

MORE REBOUND THAN STANDARD EVA

RECOIL comfort midsoles provide maximum comfort and shock absorption, by having 69%* more rebound than standard EVA. This ensures ultimate underfoot comfort and cushioning in any kind of activity and on any surface.

These durable, long lasting midsoles are synonymous with **resilience and cushioning**, by absorbing the impact of each step and releasing **higher rebound energy** to minimize discomfort and injuries. *69% higher rebound compared with regular Magnum EVA compound.

M-P.A.C.T.

M-P.A.C.T. IMPACT PROTECTION

TIME

TRANSMITTED LOAD (kN)

STANDARD FOAM PACKAGE

EXOGEL PROTECTION

Durable protection fully stitched to the upper.

Energy absorbing.

Flexes when protection is not required for comfort.

Sustains multiple impacts unlike PU or EPS foams.

Ergonomic & Flexible.

Lightweight allowing freedom of movement and provides a stable performance over a large range of conditions.

MICHELIN® OUTSOLE

1. Multifaceted sculptures for optimal traction
2. Wide grooves for flexibility
3. Siped sculptures for adherence and adaptability
4. Hollow rubber base for lightness
5. Massive sculptures for durability

The Michelin WOC (Work Outdoor Compound) outsole is highly abrasion resistant, oil and slip resistant. This outsole is inspired by the Michelin® Power Rain and Pilot Alpin tires. Designed for:

- **Comfort, flexibility and support**
- **Optimal braking and grip**
- **Specific anti-slip design** for both outdoor and indoor

MICHELIN MACH 5 OUTSOLE

Specific anti-slip tread pattern

Siped sculpture for adhesion on slippery surfaces

Wide grooves positioning for excellent water evacuation and enhanced flexibility

Special arch design for better adherence

Side sculpture for maximum support

Heel brake for optimal braking

INSPIRED BY:

Michelin® Power Rain

ENVIRONMENTALLY CONSIDERED AND SUSTAINABLE

The launch of our **MAGNUM ULTIMA** is the beginning of our very important journey to focus and develop environmentally considered, sustainable products without compromising on performance.

The upper fabric is made from 100% recycled softshell fabric made from recycled plastics. In fact, each pair of lightweight, waterproof walking boots are made from 2.97 recycled 380ml plastic bottles. With the support from Global Recycled Standards (GRS) we are able to identify, certify and quantify the exact percentage of 100% recycled materials used in the manufacturing of our products.

An important product feature to also highlight is these lightweight, waterproof walking boots are also vegan friendly.

MAGNUM's footwear boxes are already produced from 80% recycled materials and can be 100% recycled.

It is an unavoidable reality that the footwear and clothing we sell, along with the nature of our business, combine to create an environmental and social footprint.

We take this responsibility very seriously and are determined to become part of the solution and not part of the problem.

We are actively exploring multiple ways to ensure that what we sell is as sustainable as possible and environmentally considered if possible. Clearly this needs to be carefully balanced with our commitment to our products being fit for purpose and capable of performing in some of the toughest environments.

Improving our sustainability as a business is a journey to which we are fully committed. We are committed to taking the necessary steps to ensure we play our part in protecting the environment and wild places for the benefit of future generations.
